

## RICERCA E INNOVAZIONE

### RESEARCH AND INNOVATION

IT

Il mercato ricerca sempre di più i prodotti fonoassorbenti per l'uso in ambienti quali ristoranti, lounge aeroportuali, biblioteche, social clubs, hotel lobby oltre che in un ambiente ufficio. Il Centro Studi e Ricerche della Steelbox ha rinnovato il design di ZEN, proponendo un pannello che si adatta anche in spazi dove il design non è solo una mera alternativa, ma una necessità.

Il Pannello fono-dinamico Zen, concepito con una nuova estetica che richiama vagamente il famoso design capitonné, alleggerisce le linee rendendole meno piatte senza sacrificarne l'eleganza e la leggerezza del materiale.

Oltre al design, anche le performance di assorbimento acustico sono state migliorate, grazie alle cavità coniche sulla superficie, che esercitano azione di risonatori; le vibrazioni sono infatti catturate in misura maggiore e il suono rilasciato più lentamente, provocando un aumento di assorbimento rispetto alla precedente versione del pannello ZEN.

EN

The latest market research reveals the growing request for Acoustic Products to be used in different environment such as restaurants, airport lounges, libraries, social clubs, hotel lobbies as well as the office environment. Our R&D department has renewed the design of Zen, proposing a new panel decoration to ease and redefine the application in environments where the design is not just another option, it's a need.

The fono-dynamic Zen Panel has a brand new aestetich that recalls the famous design capitonné, while bringing elegance to the product it exalts the lightness of the material, reducing the flatness of the surface.

Beside the design, the performances of sound absorption have been improved, due to the conical cavity on the surface, acting like resonate rings; the vibration are being mainly captured and the sound released more slowly, causing more absorption if compared to the previous version of Zen Panel.

FR

Le marché recherche de plus en plus des produits acoustique à utiliser dans des environnements tels que les restaurants, les salons d'aéroport, les bibliothèques, les clubs sociaux, halls d'hôtel ainsi que dans un environnement de bureau. Le centre d'étude e recherche de la Steelbox a renouvelé la conception de ZEN, proposant un panneau qui s'intègre également dans les espaces où le design n'est pas juste un simple alternative, mais une nécessité.

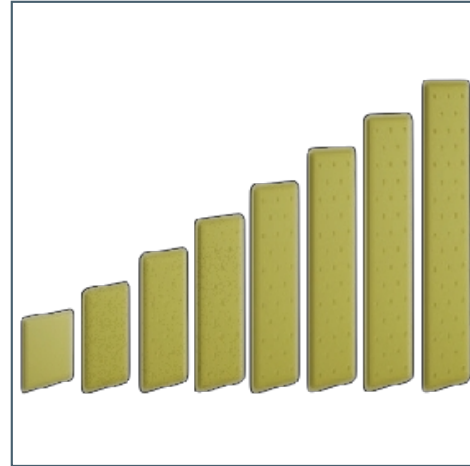

Le panneau phono-dynamique Zen, conçu avec une nouvelle esthétique qui rappelle vaguement le célèbre design capitonné, allège les lignes les rendant moins plats sans sacrifier l'élégance et la légèreté du matériel. En plus de la conception, les performances d'absorption acoustique ont également été améliorées, grâce aux cavités coniques sur la surface, qui exercent une action de résonateur; les vibrations sont en effet captées dans une plus grande mesure et son libéré plus lentement, entraînant une augmentation de l'absorption par rapport à la version précédente du panneau ZEN.

ES

El mercado busca cada vez más productos de absorción acústica para uso en ambientes tales como restaurantes, salas de aeropuertos, bibliotecas, clubes sociales, lobby de hoteles y en un ambiente de oficina. El Centro de Estudios e desarrollo de Steelbox ha renovado el diseño de ZEN, proponiendo un panel que también cabe en espacios donde el diseño no es solo uno mera alternativa, pero una necesidad.

El panel phono-dinámico Zen, concebido con una nueva estética que recuerda vagamente el famoso diseño capitonné, aligera las líneas haciéndolos menos planos sin sacrificar la elegancia y la ligereza del material. Además del diseño, las prestaciones de absorción de sonido también se han mejorado, gracias a las cavidades cónicas en la superficie, que ejercen una acción resonante; de hecho, las vibraciones se captan en mayor medida y el sonido se libera más lentamente, lo que provoca un aumento de la absorción en comparación a la versión anterior del panel ZEN.
